The collar should be worn continuously for the 8 month protection period. Check periodically and adjust fit if necessary, especially when kittens are rapidly growing. This collar is designed with a safety-closure mechanism. In the unlikely event of a cat being trapped, the cat’s own strength is sufficient to widen the collar to allow for quick release.

Replace the collar after 8 months for optimal tick and flea protection.

PRODUCT INFORMATION
Kills fleas which may cause flea allergy dermatitis (FAD) or flea bite hypersensitivity (FBH). Seresto kills existing fleas on cats within 24 hours. Reinfecting fleas are killed within 2 hours with protection against further flea infestation lasting eight (8) months. Pre-existing pupae in the environment may continue to emerge for six (6) weeks or longer depending upon the climatic conditions. Seresto aids in control of flea larvae in the cat’s surroundings following contact with a Seresto-treated cat.

Ticks already on the cat prior to treatment may not be killed immediately after collar application and may remain attached and visible. At the time of application remove ticks already on the cat. The prevention of infestations with new ticks starts within 48 hours after application of the collar.

Aids in the treatment and control of Sarcoptic mange.

Seresto is water-resistant and remains effective following a shampoo treatment or after exposure to rain or sunlight. Under normal conditions, effectiveness lasts for 8 months. In order to maintain an eight-month duration, cats must not be bathed more than once per month. For cats that get bathed once a month or more, the control duration is reduced to 5 months.

Occasionally slight itching may be observed in animals that are not used to wearing collars in the first few days after fitting. Ensure that the collar is not fitted too tightly. Slight hair loss and mild skin reactions due to the mechanical irritation of the collar may occur at the application site which usually recover within 1 or 2 weeks without the need for collar removal. If you notice any serious effects or other effects not mentioned in this leaflet, please inform your veterinarian.

In case of loss of collar, a new collar may be applied immediately.

Do not attach a leash to the collar as this may cause breakage.

Keep the collar in the bag and in the outer packaging until use. As with any pesticide product, do not allow small children to play with the collar or reflectors, or to put them into their mouths. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and cold water after fitting the collar. People with sensitivity reactions to the ingredients of the collar should avoid contact with the collar. Choking hazard. Contains small parts. Do not place collar or reflectors in mouth. Not intended for use on humans.

For external use on cats only. Do not use on other animals. Do not use on kittens under ten weeks of age. Do not get this product in cat’s eyes or mouth. As with any product, consult your veterinarian before using this product on debilitated, aged, breeding, pregnant, or nursing animals. Individual sensitivities, while rare, may occur after using ANY pesticide product for pets. If signs of sensitivity occur, remove collar and bathe your pet with mild soap and rinse with large amounts of water. If signs persist, or become more severe, consult a veterinarian immediately. If your cat is experiencing an adverse event, contact your veterinarian and call 1-800-422-9874.

As with any pesticide product, keep the collar in the bag and in the outer packaging until use. Do not attach a leash to the collar as this may cause breakage.

Dispose of container, pouch and expired collar in trash.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in original unopened container in a cool, dry place that is inaccessible to children.

Container Disposal: Dispose of container, pouch and expired collar in trash.
