For 8-month prevention and treatment of ticks and fleas on small dogs and puppies 7 weeks of age and older and up to 18 lbs. (8 kg)

Imidacloprid .............................................................................................................................10.0%

Active Ingredients: % by Weight

• No need to remove collar when your pet goes swimming or gets bathed.
• Aids in the treatment and control of Sarcoptic mange.
• Kills chewing lice for one month.
• Seresto aids in the control of flea larvae in the dog’s surroundings following contact with a Seresto-treated dog.

Replace the collar after 8 months for optimal tick and flea protection.

PRODUCT INFORMATION
Kills fleas which may cause flea allergy dermatitis (FAD) or flea bite hypersensitivity (FBH).
Seresto kills existing fleas on dogs within 24 hours. Reinfesting fleas are killed within 2 hours with protection against further flea infestation lasting 8 months. Pre-existing pupae in the environment may continue to emerge for six (6) weeks or longer depending upon the climatic conditions.
Seresto aids in the control of flea larvae in the dog’s surroundings following contact with a Seresto-treated dog.

Ticks already on the dog prior to treatment may not be killed immediately after collar application and may remain attached and visible. At the time of application remove ticks already on the dog. The prevention of infestations with new ticks starts within 48 hours after application of the collar. Re-infesting ticks are repelled and/or killed as quickly as 6 hours.
Kills lice on dogs for one month.

Aids in the treatment and control of Sarcoptic mange.
Seresto is water-resistant and remains effective following a shampoo treatment, swimming or after exposure to rain or sunlight. Under normal conditions, effectiveness lasts for 8 months. In order to maintain an eight-month duration, dogs must not be bathed more than once per month. For dogs that swim once a month or more, the control duration is reduced to 5 months.

Occasionally slight itching may be observed in animals that are not used to wearing collars in the first few days after fitting. Ensure that the collar is not fitted too tightly. Slight hair loss and mild skin reactions due to the mechanical irritation of the collar may occur at the application site which usually recover within 1 or 2 weeks without the need for collar removal. If you notice any serious effects or other effects not mentioned in this leaflet, please inform your veterinarian.

In case of loss of collar, a new collar may be applied immediately.

Replace the collar after 8 months for optimal tick and flea protection.

* Trans Z-1/trans Z-2 ratio: max 66 % trans Z-1 and min 34 % trans Z-2

DIRECTIONS FOR USE
DO NOT KEEP IN PLACE FOR MORE THAN 8 MONTHS
DO NOT USE ON PREGNANT OR NURSING ANIMALS
DO NOT LET CHILDREN PLAY WITH THIS COLLAR OR REFLECTORS
KEEP OUT OF REACH OF CHILDREN – CONTAINS SMALL PARTS

HOT LINE NUMBER
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
• For CONSUMER QUESTIONS, call 1-800-255-6826.
• For medical emergencies involving HUMANS, call 1-800-422-9874.
• For medical emergencies involving ANIMALS, call 1-800-422-9874.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.
Pesticide Storage: Store in original unopened container in a cool, dry place that is inaccessible to children.

Container Disposal: Dispose of container, pouch and expired collar in trash.

LIMITED WARRANTY AND LIMITATION OF DAMAGES
Bayer HealthCare LLC, Animal Health Division, warrants that this material conforms to the chemical description on the label. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BAYER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY, INCLUDING ANY OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY, and no agent of Bayer is authorized to do so except in writing with a specific reference to this warranty. To the extent consistent with applicable law any damages arising from a breach of this warranty shall be limited to direct damages and shall not include consequential, incidental or special damages of any kind or nature, regardless of cause or theory of recovery. The patented Bayer Polymer Matrix System ensures that both active ingredients are slowly and continuously released in low concentrations from the collar towards the animal. This avoids peak concentrations and ensures that concentrations of both active ingredients are present in the dog’s haircoat during the entire efficacy period. The active ingredients spread from the site of direct contact over the skin surface.
